NSK Endo-Mate TC2 Wireless Micromotor

Compact and lightweight cordless handpiece with fine torque control. ENDO-MATE TC2 offers high performance, is lightweight, slim and well balanced.

Via the application of Microchip technology, NSK introduces a single cordless micromotor with the capability of delivering 5 torque settings from delicate torque for fine endodontic applications through powerful torque for general procedures including prophylaxis.

9 pre-programmed speed ranges allow the operator to easily select the required speed setting for any application.

When the 16:1 reduction head is attached the speed ranges from 125 min-1 to 625 min-1. For endodontic procedures, the "TC2" button automatically activates the very fine torque control and auto reverse functions.

Features:

Cordless Handpiece: Cordless, lightweight, and compact. Comfortable adaptability to all hand size.

Auto-Reverse Function: For endodontic procedures, the "TC2" automatically activates the very fine torque control and auto reverse functions especially for application of Nickel titanium and other instruments. During a treatment, the rotation keeps rotating until your finger leaves from the switch. And if you press the switch for a moment, the rotation will stop until you press the switch again.

Quick Joint: Quick release system to exchange various head options. Excellent visibility of the work field.

A Battery Charge System: 1.5 hour quick charge delivers 1 hour continuous operation.

MASTER-DENT ZINC OXIDE EUGENOL (ZOE) REINFORCED CEMENT \$14.50

Master-Dent Zinc Oxide Eugenol (ZOE) Reinforced Cement

This cement has a sedative effect on the pulp and is especially useful for cementation on prepared teeth with exposed dentinal tubules. The addition of polymers as reinforcing agents have transformed it into a final cement and intermediate restorative material with a compressive strength of 5,400 psi. Offers excellent adhesion and easy removal.

Includes:

50g Powder
15 mL Liquid

PRIME-DENT ZINC OXIDE EUGENOL (ZOE) CEMENT KIT \$10.00

Prime-Dent Zinc Oxide Eugenol (ZOE) Cement Kit

This material is a non-irritating formulation for the temporary cementation of crowns and bridges.

MASTER-DENT CALCIUM HYDROXIDE CAVITY LINER KIT (4 SYRINGES) \$18.90

Calcium Hydroxide Cavity Liner Kit

A light cured cavity liner in a light paste consistency to facilitate application. This bio-compatible resin, filled with hydroxy-apatite, barium sulfate and fluoride, protects the pulp and dentin from acid-containing cements and restoratives.

Includes:

(4) 1.5g Syringes

PRIME-DENT ROOT CANAL FILLING MATERIAL \$16.00

Prime-Dent Root Canal Filling Material

Consists of a powder and liquid that is multi-purpose periodontal dressing and cement. It is used for dry socket and extraction therapy and may be used as a temporary filling material or temporary cement. Sets slowly out of the mouth but more quickly with contact of water or saliva. Promotes healing and has a soothing effect.

Prime-Dent Root Canal Powder and resin are mixed to produce a silver-free material with excellent sealing properties. As a result of its close application to the root canal walls and its very small contraction during setting, this material allows for tightly sealed root canal obturation with excellent tissue compatibility.

Includes:

8g Root Canal Filling Material
10g Root Canal Filling Material Resin
Measuring Scoop
Mixing Pad

Polaroid Dental X-Ray Intraoral Film

High-speed exposure time renders low radiation dose to the patient.

Pronounced dimple for easier mounting ability.

High contrast and maximum density radiographic images.

Fine grain emulsion components for optimal image resolution.

Hygienic packing, enabling disinfection of the vinyl packets, using common disinfectants.

Extra Soft vinyl packets for optimal patient comfort.

Highest quality of standards with consistent quality control.

Box has a pull out tray, making it more "user friendly."

D-Speed (Medium Speed)

The D Speed Dental X-Ray Film consists of high contrast and fine grain, providing high image quality and outstanding detail definition. This general-purpose dental x-ray film is intended for direct-exposure routine intraoral radiographs.

E-Speed (High Speed)

The E-Speed Dental X-Ray Film is intended for direct-exposure routine intraoral radiographs. The high speed of the film enables to reduce the X-ray dose of 30% in comparison with the dental films of D Class, which complies with a world-wide tendency for patients' protection. The used appliances enable to correct exposure times as well as dose values (impulses).

F-Speed (Extra High Speed)

The F Speed Dental X-Ray Film has perfect image quality and outstanding detail definition. The film is intended for direct exposure routine intraoral radiographs. This extra high speed of the film enable to reduce the X-ray dose by 50% in comparison with the dental films of D class and by 20% in comparison with E class.
